PRODUCT RELEASE

CA TPX Session Management for z/OS Version 5.4

COURSE TYPE, LENGTH & CODE

- OnDemand Web-Based Training (WBT)
- 1 Hour & 30 Minutes
- 06TPX20070

PREREQUISITES

- Familiarity with z/OS

WHO SHOULD ATTEND

- Storage Administrators
- System Programmers
- Operators
- Data Center Managers
- IT Managers

Course Overview

Your terminal is connected to a VTAM network where you have access to a number of applications. If your work requires more than one of these applications, you may have to repeatedly log off one and log on to another. This can become a time-consuming task that takes up system resources. CA TPX Session Management solves this problem by letting you access all your applications from a single menu and switch from application to application.

In this course, you will learn about CA TPX system administration, including resource tables, security setting and Printing. This course content is presented as an overview of the product and its features along with several interactive demonstrations.

What You Will Learn

- Describe the Session Manager Resource Table
- Identify CA TPX storage definitions
- Identify CA TPX security features
- Describe CA TPX Pass Ticket Support
- Describe Printer CA TPX Pass-through Support
- Describe TPXVIEW

For Managers

This course focuses on CA TPX Session Management system administration settings. Students are taught how to manage the various administrator tasks as well as incorporating the available security and printing features within CA TPX.

With knowledge of how to manage the various system tasks, your staff can design, and ultimately execute, a robust system structure that enables user and administrators to access just the information required for their job roles. This will help your staff navigate easier and faster, saving time and increasing productivity & security.

Course Agenda

- SMRT Definitions
- Storage Definitions
- Background Users
- Security Features
- Generic Resources
- ACT Definitions
- Pass Ticket Support
- PPS: Printer Pass-through Support
- TPXVIEW
