Course Overview

XCOM™ Data Transport® helps businesses address evolving strategic initiatives that require the movement of mission critical data more quickly, more reliably and, most important, more securely. With a robust architecture that powers high speed, unattended file transfers, XCOM Data Transport provides a cost-effective, flexible, and scalable solution that adapts to heterogeneous network environments.

This course covers how to use XCOM Data Transport for z/OS to perform data transfers using batch or the ISPF interface.

This Course Will Show You How To:

- Initiate an XCOM for z/OS data transfer using batch

- Initiate an XCOM for z/OS data transfer using the ISPF interface
