Course Overview

XCOM™ Data Transport® helps businesses address evolving strategic initiatives that require the movement of mission critical data more quickly, more reliably and, most important, more securely. With a robust architecture that powers high speed, unattended file transfers, XCOM Data Transport provides a cost-effective, flexible, and scalable solution that adapts to heterogeneous network environments.

This course covers how to get information about data transfers from the XCOM Data Transport for z/OS history file.

This Course Will Show You How To:

- Use Easytrieve reports to view history records of XCOM for z/OS transfers.

- Use the XCOM ISPF interface to view transfer records.
