

RC/Migrator and RC/Compare for DB2 r16: Core Functions 200

PRODUCT RELEASE

RC/Migrator and RC/Compare for DB2 r16:
Core Functions 200

COURSE TYPE, DURATION & COURSE CODE

- Web-based training
- Four (4) Hours
- Course Code: 06DBT20430

PREREQUISITES

- Experience with DB2

WHO SHOULD ATTEND

- Database Administrators
- Application Developers

Course Overview

CA RC/Migrator and CA RC/Compare are database administration products that automate error-prone and labor-intensive administration tasks. CA RC/Migrator automates tasks such as migrating DB2 objects, altering object definitions, and replication, migration and alteration task to multiple subsystems. CA RC/Compare automates the process to keep your environment's DB2 schemas consistent.

This course will show you how to set up RC/Migrator and RC/Compare. In addition, you will see how to create, analyze and execute a migration and a compare strategy using RC/Migrator and RC/Compare.

What You Will Learn

- Set up RC/Migrator.
- Create, analyze and execute an alteration strategy.
- Set up RC/Compare.
- Create, analyze and execute a compare strategy.
- Create, analyze and execute a migration strategy.

For Managers

CA RC/Migrator simplifies database administration activities to save time and reduce errors. It will enable your Database Administrators to maintain DB2 environments efficiently while having time to proactively manage other performance issues. CA RC/Compare will enable your Database Administrators to move a test structure into production without compromising the production subsystem's unique differences.

A complete understanding of these products will immediately help to improve your Database Administrator's productivity and data availability.

Course Agenda

<p>Module 1 - Set Up CA RC/Migrator</p> <ul style="list-style-type: none"> ▪ Understand CA RC/Migrator's correct uses ▪ Learn how to customize profiles ▪ Set up the parmlib member for CA RC/Migrator ▪ Setting the correct defaults 	<p>Module 2 - Create, Analyze, and Execute an Alteration Strategy</p> <ul style="list-style-type: none"> ▪ Create alteration strategies ▪ Analyze alteration strategies ▪ Execute alteration strategies
<p>Module 3 - Create, Analyze, and Execute a Migration Strategy</p> <ul style="list-style-type: none"> ▪ Create a migration strategy ▪ Analyze a migration strategy ▪ Submit a migration strategy for execution 	<p>Module 4 - Set Up CA RC/Compare</p> <ul style="list-style-type: none"> ▪ Set up CA RC/Compare and customize its profile
<p>Module 5 - Create, Analyze, and Execute a Compare Strategy</p> <ul style="list-style-type: none"> ▪ Create a comparison strategy ▪ Analyze a compare strategy ▪ Execute a comparison strategy 	

CA Education is the only authorized training source for CA Technologies.

CA Education ensures you get training anywhere, any time and any way you need it.
