Course Overview

This course provides a comprehensive overview and basic training for RC/Update™ for Db2 for z/OS. You will learn the core product features to automate tasks that are related to managing Db2 objects and Db2 data.

You will also learn how to:

- Set product, user, and group defaults to help simplify object management
- Manipulate Db2 objects (create, alter, drop)
- Manipulate Db2 data (browse, edit, copy, compare)
- Display batch processor log records

Note: If you'd like to share your ideas for Broadcom Mainframe product training, subscribe to the [Mainframe Education Community](#), where we'll share calls for input.
