

# Datacom™/DB: Datadictionary - Batch DDOL FILEMAINT, ISF, and SQL Modes 200

Type	<input type="checkbox"/> Web-Based Training
Length	25 minutes
Code	06DCM20500

**AUDIENCE**

- Traditional DBA

## Course Overview

This course teaches you how to use the FILEMAINT Mode to create Non-DB Model file structures, while utilizing the ISF (Interactive Service Facility) Mode to access Datadictionary entity occurrences, and put to use the SQL Mode to execute DDL (Data Definition Language) and DML (Data Manipulation Language) statements and have them saved as members in a DDOL VLS Library.
