BROADCOM®

Getting Started with DevOps: Introduction to DevOps 100

EDUCATION COURSE DESCRIPTION

COURSE TYPE, LENGTH, & CODE
- Web-based Training
- 45 minutes
- 06DEV10010

WHO SHOULD ATTEND
- Developers
- Systems Engineers
- Administrators

Course Overview

DevOps is a set of practices and philosophies that combines software development and IT operations. Its goal is to shorten the development life cycle and provide continuous, high-quality deliverables while evolving and improving the process with each delivery.

This course will introduce you to the concepts and implementation of DevOps in a Mainframe environment.

This Course Will Show You How To:

- Define DevOps

- Identify potential roadblocks to Mainframe DevOps

- Identify a typical DevOps workflow on the Mainframe

- Define CA Endevor Integrations for Enterprise DevOps

BROADCOM®

Course Agenda

Module 1: Definition of DevOps	**Module 2: Roadblocks to Mainframe DevOps**
• Define DevOps • Identify other open-source DevOps products	• Identify potential roadblocks to Mainframe DevOps

Module 3: DevOps on the Mainframe Environment	**Module 4: CA Endevor Integrations for Enterprise DevOps**
• Identify a typical DevOps pipeline on the Mainframe	• Define what is the product called CA Endevor Integrations for Enterprise DevOps • Identify CA Endevor Integrations for Enterprise DevOps includes its three key features
