- 06END10160

PREREQUISITE(S)
- Knowledge of the Endevor platform

WHO SHOULD ATTEND
- Application Developers
- Quality Control Engineer
- Development Manager
- QA Manager
- Product Manager
- Change Administrator

Course Overview

Software development and deployment involves many steps and stages and can be slow and prone to errors when these steps are manually performed. Endevor is an integrated set of management tools used to automate, control, and monitor the mainframe software development lifecycle. It can automate your entire development process, adapting to your specific business requirements and helping ensure consistency and complete control.

Endevor automates the entire development process, providing complete change and configuration management and supporting the unique lifecycles of each organization.

This course will show you how to plan the software lifecycle with Endevor, how to use element actions to develop, manage, and control software changes.

This Course Will Show You How To:

- Describe Inventory Structure and Management

  - Display Element Information

  - Display Footprint Information

- Identify Additional Features and Plug-ins

BROADCOM®
MAINFRAME SOFTWARE
