- CA Workload Automation Workstation for ESP Overview: Workload Editor 100 (06ESP10060)
- CA Workload Automation ESP Edition Foundations: Understanding Applications 200 (06ESP20020)
- CA Workload Automation ESP Edition Foundations: Customizing Applications 200 (06ESP20060)

Course Overview

Hosted on z Systems™, CA Workload Automation ESP Edition (CA WA ESP Edition) utilizes an object-oriented architecture to reduce and simplify scheduling definitions. Operations and application development teams can easily define schedules and calendars once and reuse them many times.

This course is designed to provide the next generation of CA WA ESP Edition users with a high-level overview of procedures and how to work with them using CLANG and built-in functions.

This Course Will Show You How To:

- Describe the syntax that procedures support.
- Work with the CLANG syntax rules, constructs, and operators.
- Understand the calendar, job selection, symbolic variable, workload status, and system activity built-in functions.
