- Administrators and Operators who define and interpret alerts

## Course Overview

Hosted on z Systems™, CA Workload Automation ESP Edition (CA WA ESP Edition) utilizes an object-oriented architecture to reduce and simplify scheduling definitions. Operations and application development teams can easily define schedules and calendars once and reuse them many times.

This course is designed to provide the next generation of CA WA ESP Edition users with a high-level understanding of how to trigger an alert event for a job or jobs in an application.

## This Course Will Show You How To:

- Understand the differences between job monitoring and alert processing.
- Describe the role the NOTIFY statement plays in events, including alert events.
- Define an alert.
