Course Overview

A password phrase is a character string that consists of :

- mixed-case letters,
- numbers, and
- special characters including blanks.

Password phrases have security advantages over passwords as they are long enough to withstand most hacking attempts and are unlikely to be written down because they are easy to remember.

This course provides a series of recordings regarding getting started with password phrases with Client Manager.

This Course Will Show You How To:

- Articulate an overview of password phrases in Client Manager
- Apply PTFs
- Update or Create client manager server configuration
- Customize TIRSECV - Security Validation Exit
- Customize ENCRYPT and DECRYPT
