Course Overview

IBM MQ is a popular messaging system that enables z/OS applications to share information with other applications on z/OS and other platforms. CA IDMS 19.0 now includes support for IBM MQ on z/OS in the base product.

In this video, you will see the capabilities of the CA IDMS MQ Adapter and how it can provide a robust and cost-effective way to enable your CA IDMS online applications to communicate with other MQ applications.

This Course Will Cover:

- IBM MQ Overview
- IDMS MQ API
- MQ Sessions
- Trigger Monitor
- DCMT Commands
- MQ Statistics
