Course Overview

Application Development System (ADS) is a tool that is used to expedite the writing and testing of modular applications. With ADS, you can develop online and batch applications.

Activities such as flow-of-control processing, data storage definition, data verification, editing, and error handling are specified through a series of screens instead of conventional detailed code.

This course covers how to create a map, a dialog, and an application in ADS/Online.

In This Course, You Will Learn How To:

- Create a Map
- Create a Dialog
- Create an Application
