COURSE TYPE, LENGTH, & CODE

- Web-Based Training (WBT)
- 45 Minutes
- 06IDM20680

Course Overview

Application Development System (ADS) is a tool that is used to expedite the writing and testing of modular applications. With ADS, you can develop online and batch applications.

Activities such as flow-of-control processing, data storage definition, data verification, editing, and error handling are specified through a series of screens instead of conventional detailed code.

This course shows you how to use the Map Compiler to create and maintain 3270 maps.

In This Course, You Will Learn How To:

- Invoke the Map Compiler
- Use the Map Compiler to build full-function Maps
