CA Mainframe Resource Intelligence: Overview Foundations 100

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASES
CA Mainframe Resource Intelligence Version 1.0.0 and higher

COURSE TYPE, LENGTH, & CODE
- Web-Based Training (WBT)
- 10 minutes
- 06MRI10010

PREREQUISITES
- None

WHO SHOULD ATTEND
- System Programmers

Course Overview

CA Mainframe Resource Intelligence is a lightweight cloud-based solution designed to optimize operational efficiencies and reduce risk, with impactful findings and recommendations.

This solution analyzes mainframe environments and quickly generates assessments that provide recommendations to help optimize efficiency, reduce costs, and mitigate risks—without requiring a significant investment by mainframe ops teams.

This Course Will Show You How To:

- Explain the value of CA Mainframe Resource Intelligence via a use case.

- Describe, at a high level, the what, why, and how of CA Mainframe Resource Intelligence.

- Explain how CA Mainframe Resource Intelligence gathers and secures your data.
