PRODUCT RELEASE

CA OPS/MVS Event Management and Automation r12.x

COURSE TYPE, LENGTH & CODE

- Web-Based Training (WBT)
- Thirty (30) Minutes
- Course Code: 06MVS20050

PREREQUISITES

- CA OPS/MVS Event Management and Automation r12.x: Introduction 100

  Course Code: 06MVS10130
  Two (2) hours WBT

WHO SHOULD ATTEND

- System Administrator
- Availability Manager

Course Overview

The constantly changing states of started tasks, subsystems, and other resources, and the dependency of the state of one resource on the state of another resource, cause challenges in managing the mainframe environment. CA OPS/MVS System State Manager (SSM) automates and controls the state management of system resources such as started tasks, JES initiators, VTAM nodes, and so on, thus simplifying the management of critical resources.

This course provides you with an overview of how SSM can be used to implement cross system resource management. At the end of this training, you will be able to describe how SSM works to control the state of managed system resources.

This course is also available as part of CA OPS/MVS Event Management and Automation r12.x: System State Manager 200 Bundle. Course Code 06MVS2009B.

What You Will Learn

- Describe how SSM works by identifying the key features and functioning of SSM.
- Identify the Relational Data Framework (or RDF) tables at the core of SSM to define the actions needed to configure SSM in your environment.

For Managers

To ease the management of critical resources, it is essential to implement a tool that automates and controls the management of system resources. SSM creates a focal point of control for defining and monitoring all your system resources primarily the many started tasks within your environment.

This course provides a basic overview of the SSM facility and how it provides you with the tools to simplify the effort of task management across your systems. At the end of this course, the learners will be able to identify how to use SSM to manage the state of critical resources to reduce downtime, increase market value, and improve customer satisfaction.

RECOMMENDED NEXT COURSES

- CA OPS/MVS Event Management and Automation r12.x: System State Manager Implementation

  Course Code: 06MVS20070
  One (1) Hour Thirty (30) Minutes WBT

- CA OPS/MVS Event Management and Automation r12.x: System State Manager Maintenance and Troubleshooting

  Course Code: 06MVS20080
  Thirty (30) Minutes WBT

Course Agenda

Module 1 – System State Manager Overview	
- Describe the feature and functioning of SSM - Describe the tables at the core of SSM - Describe how SSM performs actions to maintain the desired state
