Course Overview

OPS/MVS® Event Management and Automation (OPS/MVS) gives organizations the ability to simplify mainframe management through user-defined automation policies to meet business objectives.

This course consists of a downloadable presentation that helps aid your migration to OPS/MVS from Opera.

This Course Will Show You How To:

- Compare the Opera features to OPS/MVS features.
- Explain the migration path for each Opera feature.
- List the event types, product components and interfaces, interfaces to external products, and entitlements that are provided with OPS/MVS.
