

# Overview and Basic Training of RC/Query® for Db2 for z/OS

Type	<input type="checkbox"/> Web-Based Training
Length	15 minutes
Code	06RCQ20040

## AUDIENCE

- Traditional System Programmer
- New to the Mainframe DBA
- Traditional DBA

## Course Overview

This course will provide an overview and basic training of RC/Query® for Db2 for z/OS. The course will teach you how to understand the task of accessing the Db2 catalog objects to provide a full-screen interface and recognize the line commands and the related reports that are available both online and in batch. It will also help you identify the Extended Query Facility (EQF) and how it helps to enhance queries and create and manage customized report formats. This overview will also include how to generate DDL, Utility JCL for jumping to other products, Utility Models, and how to Report Catalog information.
