

CA Workload Automation CA 7[®] Edition: REST API Introduction 100

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT

RELEASE(S)

CA Workload Automation CA 7[®]
Version 12.1
CA 7 REST API
Versions 1.0.0 and 12.1.0.1

COURSE TYPE, LENGTH, & CODE

- Web-Based Training (WBT)
- 15 Minutes
- 06SEV10100

Course Overview

The CA 7 REST API is an application programming interface to a number of CA 7 services. In accordance with widely accepted REST (REpresentational State Transfer) architectural guidelines, each service handles request and response parameters in either JSON or XML format. Services are requested using standard HTTP operations like GET, POST, PUT, and DELETE.

This course introduces the CA 7 REST API and provides information about the services, architecture, required components, and the available installation platforms. The training describes the initial release of CA 7 REST API (1.0.0) and the current release (12.1.01).

This Course Will Show You How To:

- Describe the CA 7 REST API and Web Services
- Describe a CA 7 REST API service URL
- Describe the services available with the CA 7 REST API
- Describe using the CA 7 REST API with ZOWE
- Describe the REST API components
- Identify supported platforms for the CA 7 REST API server
- Identify required Mainframe components
