Course Overview

CA 7 Workload Automation automates many of the labor-intensive tasks associated with workload management and monitoring for the Z Systems and supports an agile and business-centric IT environment.

This course introduces the concept of virtual resources and their different types and shows users how to define them in both Web Client and 3270.

This course is part of a larger bundle of Web-Based Training courses that contains the same information as the Instructor-Led Training 06SEV20081.

This Course Will Show You How To:

- Understand the various types of Virtual Resources available in CA 7
- Define job to resource connections to support using Virtual Resource Management (VRM) capabilities
