## Course Overview

CA 7 Workload Automation automates many of the labor-intensive tasks associated with workload management and monitoring for the Z Systems and supports an agile and business-centric IT environment.

This course introduces how CA 7 obtains and controls JCL, use JCL control cards to provide additional job management capabilities, and how to edit JCL in both Web Client and 3270.

This course is part of a larger bundle of Web-Based Training courses that contains the same information as the Instructor-Led Training 06SEV20081.

## This Course Will Show You How To:

- Understand how CA 7 obtains the JCL for jobs
- Specify controls on the JCL content being loaded
- Use JCL control cards to provide additional job management capabilities
- Automate JCL updates through CA Driver and Global Variables
