Smart/RESTART Solution Overview

Type	🖥 Web-Based Training
Length	10 min
Code	06SMR20010

AUDIENCE
- New to the Mainframe DBA
- System Operator
- Traditional SysProg

Course Overview

This course will teach you how Smart/RESTART is the best solution when you want to process more data faster using multiplatform mobile applications. Smart/RESTART will help you enable legacy applications without COMMIT logic via external checkpoint definitions. It will improve concurrency and availability in a data-sharing environment and reduce the cost of machines and people from operations, support, and development. All while avoiding breaches of SLAs and business problems.

Note: If you'd like to share your ideas for Broadcom Mainframe product training, subscribe to the Mainframe Education Community, where we'll share calls for input.
