SUPPORTED PRODUCT RELEASES

CA Spool™ Version 14.0

COURSE TYPE, LENGTH, & CODE

- WBT
- 60 minutes
- 06SPO20030

WHO SHOULD ATTEND

- Administrators
- System Programmers

Course Overview

CA Spool™ is a solution that securely manages your business-critical print and report delivery requirements across networks, platforms, and locations. CA Spool provides nonstop operation as it collects reports from multiple sources (including z/OS, Windows, Linux, and UNIX), while offering enterprise-wide spooling and print capabilities. CA Spool enhances your current spool environment, providing a central point of control over day-to-day print management issues and securing the distribution of important data.

This course is designed for anyone responsible for CA Spool installation and maintenance and consists of an hour-long recorded presentation designed to explain and demonstrate the process of installing Java transformers.

This Course Will Show You How To:

- Describe the CA Spool Java transformers and their benefits.
- Identify the software requirements for installing the Java transformers.
- Understand the installation process.
- Explain the post-installation steps.
