

TAMz: Performing Self-Elevation to Gain Privileged Access 200

EDUCATION COURSE DESCRIPTION

COURSE TYPE, LENGTH, & CODE

- WBT
- 7 Minutes
- 06TAM20020

WHO SHOULD ATTEND

- Customers

Course Overview

This video will demonstrate how a Systems Programmer who no longer has 24x7 access to a system-critical parameter library and accessing it results in an authorization failure. To gain access to this critical system resource, the Systems Programmer needs to:

- Displays a list of TAMz Classes that he/she can elevate to
- Selects the TAMz Class that allows access to the resource
- Elevate to the TAMz Class that he/she is authorized for accessing the system-critical library
