Course Overview

View™ is a scalable and extensible report management solution designed to help you reduce costs and comply with the regulations while enhancing document management within your enterprise by:

- Minimizing time-consuming manual tasks and lowering document delivery and storage costs

- Increasing productivity with selective viewing, publishing and managing of all enterprise report assets

- Streamlining data sharing from various enterprise sources, including applications on the mainframe, mid-tier servers and individual desktops

This course is designed to teach you how to use the SARSTC started task for SYSOUT archival and to run backups of the View database.

This Course Will Show You How To:

- Use the SARSTC task for SYSOUT archival.

- Use the SARSTC task to run backups of the View database.

- Start and stop the SARSTC started task.
