

# Running a Batch Job in VM:Batch™

**Type**  Video  
**Length** 8 min  
**Code** 06VMB10010

## AUDIENCE

- System Architect
- System Operator

## Course Overview

This demonstration introduces how to use VM:Batch at the novice level, including setting user experience levels, submitting jobs, viewing job logs, and managing jobs. We also review how VM:Batch interfaces with VM:Schedule for timed job execution. Finally, we'll walk through job status monitoring, queues and job logs.

### Outline:

- Getting Started
- Submitting a Job
- Monitoring and Controlling Your Job
- Removing a Job
- Additional Information
