- CA Vantage™ Storage Resource Manager: Getting Started with the Mainframe Team Center - Management Interface 200 (06VSR20020)
- Understanding of basic storage management concepts
- Familiarity with z/OS

WHO SHOULD ATTEND

- System Administrators
- System Programmers
- Operators
- IT Managers

Course Overview

CA Vantage™ Storage Resource Manager (CA Vantage SRM) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

This course prepares you to set up object logging and create trend reports using Mainframe Team Center - Management interface to CA Vantage SRM.

This Course Will Show You How To:

- Use the wizard to create log scripts
- Modify or delete log scripts
- Generate trend data from the logged data
