Course Overview

Vantage™ Storage Resource Manager (Vantage) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

Vantage StoragePoint™ Web Client (Vantage StoragePoint) is an easy-to-use browser interface for Vantage, with centralized monitoring, configuration, and policy-based automation features.

This Course Will Show You How To:

- Navigate using the User Menu, Navigation Pane, and Dashboards
- Explain the differences between public and private hosts
- Create a private host
- Understand factory dashboards versus user-defined public or private dashboards
- Create and modify a dashboard or user view
- Understand the differences between dashboards and user views
- Export a dashboard chart
- Import and export dashboard definitions
- Customize object data collection and presentation
- Evaluate, view, and perform actions on an object
