PREREQUISITES
- Vantage StoragePoint ™ Web Client: Getting Started 200 (06VSR20260)
- Understanding of basic storage management concepts
- Familiarity with z/OS

RESOURCES
- [Access Learning@Broadcom](#)
- [Product Documentation](#)
- [Mainframe Education Community](#)
- [Vantage StoragePoint Community](#)

Course Overview

Vantage™ Storage Resource Manager (Vantage) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

Vantage StoragePoint™ Web Client (Vantage StoragePoint) is an easy-to-use browser interface for Vantage, with centralized monitoring, configuration, and policy-based automation features.

This course prepares you to set up object logging and create trend reports using Vantage StoragePoint.

This Course Will Show You How To:

- Use the wizard to create log scripts.

- Modify or delete log scripts.

- Generate trend data from the logged data.
