

# Vantage StoragePoint™ Web Client: Scripts and Event Servers 200

## EDUCATION COURSE DESCRIPTION

### COURSE TYPE, LENGTH, & CODE

- WBT
- 15 minutes
- 06VSR20340

### WHO SHOULD ATTEND

- System Administrators
- Systems Programmers
- Operators
- IT Management

### PREREQUISITES

- Vantage StoragePoint™ Web Client: Getting Started 200 (06VSR20260)
- Vantage StoragePoint™ Web Client: General Object Automation 200 (06VSR20270)
- Understanding of basic storage management concepts
- Familiarity with z/OS

### RESOURCES

- [Access Learning@Broadcom](mailto:Access_Learning@Broadcom)
- [Product Documentation](#)
- [Mainframe Education Community](#)
- [Vantage StoragePoint Community](#)

## Course Overview

Vantage™ Storage Resource Manager (Vantage) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

Vantage StoragePoint™ Web Client (Vantage StoragePoint) is an easy-to-use browser interface for Vantage, with centralized monitoring, configuration, and policy-based automation features.

This course prepares you to work with scripts and control the event servers using Vantage StoragePoint.

## This Course Will Show You How To:

- Describe the differences between System, Audit, Log, and Automation scripts
- Review script activity
- View scripts and control their status
